XEROX

Director of Central Intelligence
Central Intelligence Agency
Washington, D.C. 20505

16 October 1981

Dear Sir/Madam:

I understand that a procedure, devised by the government, exists for testing the security of data processing and/or communications equipment - called "Tempest Testing".

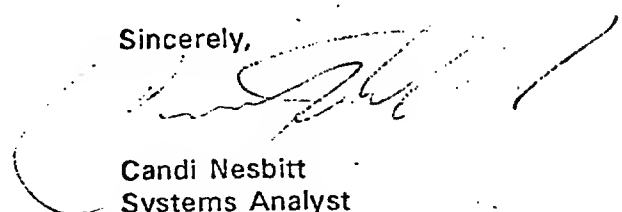

In speaking to [redacted] this date, he directed me to send a letter of request to the CIA, for the specifications and requirements of this test.

Xerox (Printing Systems Division) introduced the 5700 Electronic Printer to the word processing, data processing, copier, and communications marketplace. Our sales/service organization supports both government and commercial concerns, and in this environment, considers the importance of initiating "Tempest" on the 5700.

Please contact me if you require more information on our product, or my aid in this effort, (841-5209).

Thank you.

Sincerely,

Candi Nesbitt
Systems Analyst
Xerox Printing
Systems Division

Printed on the Xerox 5700 Electronic Printing System.
